

Dear Employees, Clients, Partners, and Suppliers:

As many of you already know, The Ontario government as part of its next stage of reopening is allowing for all construction activities to resume with a number of precaution's in place.

That said, the government and health and safety associations have released more than 90 safety guidance documents to assist employers in multiple sectors, including construction to help protect the safety of workers and the general public. The details regarding the safety guidance documents for the construction sector can be found by [clicking here](#).

As a result of this, all of our projects have fully resumed, and we continue to be 100% operational. We do not anticipate any further restrictions within the construction field or any of our projects into the foreseeable future. Should there be future changes to the status of Ontario's construction sector, we will ensure that our Employees, Clients, Partners, and Suppliers are notified, and we will post a status update on our safety page.

The safety of our workers, our clients' and the public as a whole remains our top priority. As such, all of us at GeoSolv are in full support of the government's efforts to reduce the impact of COVID-19 on our province.

Health Canada recommends that you follow the below guidelines:

- Wash your hands often with soap and warm water for at least 20 seconds
- Avoid touching your eyes, nose and mouth with unwashed hands
- Cough or sneeze into a tissue or your sleeve, not your hands
- Practice social distancing—maintain a 2m separation from others
- Any person experiencing cold or flu-like symptoms should not report to work and should notify their immediate supervisor by phone.

Health Canada also has a rich resource section relating to COVID-19, which can be found [here](#).

We will continue to monitor the situation closely and follow the advice of industry and government officials
