

Dear Employees, Clients, Partners, and Suppliers:

We are pleased to say that all of our existing and new projects are and have been fully operational and progressing throughout the entire summer. That said, Physical distancing as well as a range of many other safety precautions have remained firmly in place on all of our sites, as well as at our office location. Most notably, we have instituted a digital COVID Screening Questionnaire as all Ontario workplaces are now required to screen employees for Covid-19 related symptoms and risk factors prior to entry into the work environment.

Personal safety continues to be our number one priority, by our own admission and as outlined by the government of Ontario. A regularly updated and detailed reference for these guidelines, specifically for the construction sector can be [found here](#).

We are now well into the Fall season, and as you already know, Ontario is experiencing an upsurge in Covid cases, and Ontario rules and regulations are changing rapidly as Covid-related statistics fluctuate. We are keeping abreast of these changes and will communicate any changes to how we work with all of our stakeholders.

Continue Protecting Yourself and Your Coworkers:

Coronaviruses are spread through close contact, including at work. Here are some helpful tips to help prevent the spread of germs:

- Wash your hands often with soap and water or alcohol-based hand sanitizer.
- Sneeze and cough into your sleeve.
- If you use a tissue, discard immediately and wash your hands afterward.
- Avoid touching your eyes, nose or mouth.
- Avoid contact with people who are sick.
- Stay home if you are sick.
- Avoid high-touch areas, where possible, or ensure you clean your hands after.
- Wash your clothes as soon as you get home.
- If you are ill: notify your supervisor immediately, complete the [self-assessment](#) and follow the instructions you get.
- Where possible, wear gloves when interacting with high-touch areas. Do not touch your face with gloved hands.
- Take care when removing gloves. Ensure you wash your hands after removing them.
