

GeoSolv Design/Build Inc. is the leading geotechnical design-build contractor in Ontario providing turnkey solutions to soil problems. Join a dynamic team with a rewarding work environment and learn about the expanding world of ground improvement and alternative foundation systems.

We are hiring Heavy Equipment Operators to work on our Ground Improvement Projects throughout the Greater Toronto Area, as well as other areas in Southern Ontario.

This is an exciting opportunity to grow or continue your career as a heavy equipment operator with consistent work in a positive work environment. We are willing to train, however experience operating loaders, skidsteers, excavators or piling/drill rigs is a definite asset. Successful candidates will need to join or be members in good standing with IUOE 793.

Job Description:

- Heavy Equipment Operator

General Responsibilities Include:

- Working on Ground Improvement Projects throughout the GTA & Southern Ontario

Qualifications / Requirements:

- Previous experience as a heavy equipment operator
- Candidates will need to join or be members in good standing with IUOE 793
- Good written and verbal communication skills
- Works well with others and is a team player
- Must be willing to and able to travel to various project sites across Ontario
- Must have a valid driver's license and provide their own transportation to and from jobsites

Please email your resume to employment@geosolv.ca and reference "Heavy Equipment Operator Position" in the subject line.

We look forward to hearing from qualified candidates
